SUMMARY

"I am a dedicated backend developer with five months of hands-on experience in Node.js. Currently, I am pursuing my internship at Prudas Technology Pvt Ltd, where I am actively contributing to the development of SpiralsHealth 2.0, an upcoming and advanced version of the healthcare software. My role involves working on critical backend components, enhancing the platform's performance, and ensuring its readiness for the next phase of healthcare innovation."

EDUCATION

M.C.A in Computer Science

Mdu Unversity

📅 2021 - 2023   📍 Faridabad,Haryana

GPA
3.5 / 4.0

EXPERIENCE

Trainee Devloper

Prudas Technologies Private Limited

📅 2023 - Present   📍 Noida,UP

Spirals Health is a Web-based and App based software where patient can search nearby doctor, book an appointment online and doctor can build up its digital presence by adopting our powerful solutions to grow their practice. Easiest way for appointment scheduling over Web, phone or personal, and single screen e-prescription system.

- I have been hired and am presently undergoing intensive training and mentorship under senior developers.
- Proficiently managing databases using MongoDB Compass, a comprehensive database administration tool, to ensure data integrity, performance optimization, and efficient data retrieval.
- Additionally, I possess frontend development skills, having designed and implemented user-friendly interfaces using HTML, CSS, and Bootstrap. Proficient in creating responsive web designs and interactive forms.

STRENGTHS

Team Leadership

Natural leadership skills showcased through effective team collaboration, decision-making, and the ability to motivate and inspire team members to achieve common goals.

Communication

Proficient in conveying ideas and information clearly and effectively.

PROJECTS

Spiralshealth care

📅 2023 - Present   📍 Noida

- Developing a Web and App-based software, "Spirals Health," enabling patients to search for nearby doctors, book appointments online, and providing doctors with a digital platform to enhance their practice.
- Implemented the backend using Node.js, following the MVC pattern, to ensure efficient data handling and application structure.
- Designed and implemented the registration and login controllers, incorporating token generation for user authentication.
- Utilized various third-party NPM packages to enhance the platform, including message sending and OTP generation for user verification.
- Employed MongoDB for data storage and management, ensuring seamless access to patient and doctor information.
- Implemented URL slugs for user-friendly and search engine optimized URLs.
